## Use continuous survey for maximum accuracy

When the outrun option is selected for the end of the well, the GyroMaster tool becomes a north seeking continuous survey tool. Capable of surveying in any application, customers can automatically create highly accurate independent surveys.

## Latest core retrievable feature

During the core retrieval survey, the GyroMaster + Gyro CR allows continuous outrun measurements, guaranteeing superior quality control. This option allows the end user to save time and money, by reducing the need for a 3rd party survey service at the end of the well.

## Automated software shows real-time data

GyroMaster's intuitive software ensures accuracy throughout the operation. Our smart sensor technology obtains data in real-time and automatically generates detailed pdf reports that can easily be shared with all stakeholders.
