

# Optical Depth Counter

ENSURE SURVEY ACCURACY WITH  
PRECISION DEPTH CONTROL

Lightweight, compact and  
easy to use measuring device.

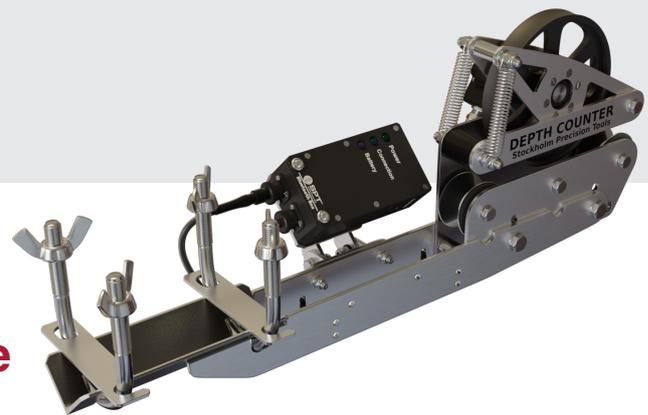

# Optical Depth Counter

## Specifications

Equipment	
Ingress protection	IP66
Battery type	Li-Ion
Battery life	12 hours
Input encoder data	Pushpull, open drain, open collector
Communication	Bluetooth/USB 2.0

Performance	
Accuracy	1/1000
Temperature	-20°C to 60°C (-4°F to 140°F)
Bluetooth® range	20m

## Compact and lightweight device for measuring wireline depth

The SPT Optical Depth Counter device is designed to be mounted to the rod of a drilling unit. One of the benefits compared to other measuring devices is that it measures depth on wireline cables from 4mm to 10mm (0.15" to 0.39"). This device will work on both open and cased hole, using a tripod or clamping device.

## Dual spring-loaded measuring platform

This device measures the amount of wireline moving to and from the borehole. The measuring wheel is coupled to an encoder that transmit electrical signals via a cable to the Bluetooth® box and/or logging computer.

## Long range wireless connection

The SPT Optical Depth Counter integrates perfectly into any SPT suite of mobile applications. Utilizing our long distance Bluetooth® connection of up to 20m, work can be performed safely in any environment. Information is automatically transferred and incorporated into the SPT logging software.
