CoreMaster™

Single instrument for
different diameters

Digital core orientation
system that
provides directional
characteristics of a
geological core sample

CoreMaster™

Technical specifications

Core orientator	
Temperature	-30°C to 75°C (-22°F to 167°F)
Weight	2.6 kg (5.2 lb)
Range	-87° to +87° Inclination
Depth rating	3500m or 5000psi
Diameter	N, N2, N3, H, H3, P, NTW, HTW
Accuracy	± 1°
Battery	Field replaceable

Handheld device	
Protection rating	IP67
Temperature range	-20°C to 55°C (-4°F to 131°F)
Connectivity	4G, WiFi, Bluetooth, SPT Cloud

Benefits	
For geotechnical and mining industries	
Single instrument for different diameters	
User friendly application with QA/QC integrated	
Records inclination and temperature	
Follow remotely the ROP of your drillholes	
SPT-CLOUD compatible	
Valve system to ensure pump-in time is not compromised	
No need to open the thread for pairing/connection »»» high speed Bluetooth	

Application

Digital core orientation system that provides directional characteristics of a geological core sample extracted from the subsurface and other key data in core drilling operations such as temperature and inclination.

High level of data accuracy leads to better understanding of the composition of the subsurface. However, in order to accurately interpret the information obtained from the core sample, it is necessary to have knowledge of the orientation of the core sample relative to the subsurface from which it was extracted.
